Job Application for Fullstack Developer

Dear Hiring Manager,

About Me

I am a Computer Engineering new graduate, I studied at Lassonde School of Engineering, York University. I am a quick-learner and can work both independently and as part of a team. I am interested in beginning a career in the software industry and growing as a professional.

Why Me?

I have gained experience in many programming languages through coursework, such as Python, JavaScript, C, Java, and I have developed in Windows and Unix/Linux. In my previous Co-op I worked as part of a team on a large web conversion of the Public Accounts of Canada 2018, the junior members of the team were commended for our efficiency during the project as we finished by the deadline and did not delay the project. Our team used guides created and maintained by past team members, which included instructions on how to complete the tasks and solutions to common problems. I was commended by my manager for my diligence and initiative as I assisted other team members with any issues while also completing my own sections.

I have front end development and some back end development experience through my capstone project. As a team of five we developed an Energy Management System as a web application. I worked on majority of the front end components since I was the only one assigned to front end development, aside from our software lead. We developed our frontend using React, redux, Material UI and JavaScript. I am also experienced in customer service and User Experience from both coursework and previously working in a retail environment. Also, from my previous work experience I have strengthened skills such as communication, teamwork, and problem solving, as I would often need to defuse tough situations.

Thank you for taking the time to review my application, if you would like to contact me, I can be reached on my cell phone at 647-868-4912, or by email at edward-cong@outlook.com, I look forward to hearing your response at your earliest convenience.

Sincerely,

Edward Cong
